Keywords: *Dev-ops, Docker, Cloud, continuous integration, customer deployment*

Job Reference: SCIDOE19

Job Title: Systems Integration/ DevOps Lead

Location: Cambridge, UK

Salary: £Competitive dependent on experience

Benefits: Healthcare, pension (7%), eligible for stock options, bonus plan, 25 days' annual leave

Hours: 37.5 hours (Monday – Friday)

The Company

SciBite is going places. A successful and fast-growing informatics company based in Cambridge, we are transforming the way life science organisations handle text and documents. Our TERMite™ software performs rapid analysis of scientific and healthcare text to generate actionable insights for the top ten pharma, biotech and healthcare customers. In the last three years we have seen significant growth to an international organisation with a presence in Japan and in the USA.

Joining us means that as well as a highly competitive salary and fantastic benefits package, you will have the opportunity to learn and shape the cutting edge of informatics and drug discovery with some of the world's major pharma and life science companies. A dynamic, passionate and close-knit team, we're always learning new approaches and skills and will actively encourage you to engage in some of the hottest new technologies out there today.

We are now seeking an ambitious Systems Integration or Dev-Ops engineer to develop and support both cloud-based and on premise infrastructure. This role presents an incredible opportunity to learn the latest cloud technologies as well as being intrinsically involved in some ambitious and personally rewarding projects that support cutting edge information science.

Main Duties

- Developing and maintaining infrastructure-as-code. Modifying and building new deployment methodologies as required.
 - Deploying n-tier applications on client sites and on the cloud. Working to deploy systems on a wide variety of target architectures
 - Managing CI/CD systems
 - Managing internal infrastructure and services such as email, authentication services, DNS etc.
 - Work to deliver exceptional customer support at all times
-

Experience and skills

Essential	<ul style="list-style-type: none">• Experience with cloud providers, eg. AWS, Linode, GCP• Configuration management and orchestration (Terraform , etc)• Management of CI/CD systems, eg. Jenkins• Linux admin expertise and shell scripting• Proxy server configuratons for security and load balancing, eg. nginx• Experience in taking on new challenges outside of their comfort zone, taking in new technologies as and where necessary• Comfortable in representing SciBite at customer and public meetings and strong interpersonal skills• Bring the right 'Can Do' approach to fit our company culture
Desirable	<ul style="list-style-type: none">• Understanding of big data technologies such as Spark and the Hadoop ecosystem• Docker - creating and deploying images• Scripting ability in Python or similar• Experience with Elasticsearch cluster management• You'll be running SAAS systems for customers so some level experience at this interaction is desirable
