Job Title	Software Tester
Location	Cambridge, UK
Salary	£ Competitive dependent on experience
Benefits	Healthcare, Pension, Bonus plan, 25 days annual leave
Hours	Hours: 37.5 hours per week (Monday – Friday)

The Company

SciBite Limited is a multi-award-winning life-sciences technology company based in Cambridge UK which is transforming the way life science organisations handle text and documents. Our semantic deep-learning solutions understand the complexity and variability of content within Life Sciences yet are still simple to use. We can quickly identify and extract scientific terminology from unstructured text and transform it into valuable machine-readable data. Our tools are flexible and versatile, facilitating use by both end-user scientists and integration into 3rd party applications. Our team of expert software engineers and data scientists are at the forefront of the latest developments in AI, such as ontologies, knowledge graphs and machine learning. Through our parent company, Elsevier, our team has access to an incredible range of resources, content and opportunity from a global life-science leader, while retaining that agile small company feel.

The Role

We are looking for an enthusiastic software tester to join the SciBite software team. You'll be joining at an exciting time as we design and develop innovative components to some of our existing offerings and prepare to launch new platforms in search and machine learning. You will play an important role in making the team's vision a success by ensuring our software meets modern quality control standards. SciBite is focused on developing approaches to help scientists and those working in the life sciences. The problems we tackle impact real scientific applications and are intellectually interesting. As a member of the team you will be involved in the software development life cycle from design to delivery and in ensuring the work, we do is reliable and robust. The main duties of this role include:

Duties

Write and execute test scripts using our TestRail suite

- Run manual and automated tests
 - Provide quality assurance over processes
 - Communicate testing outcomes to technical and non-technical stakeholders
 - Working to deliver exceptional customer support
-

Qualifications/Skills/Experience

The ideal candidate for this role will have:

- ISTQB qualification or be willing to develop in this area. Support will be provided
- Be able to understand a given system and identify key areas for testing
- Must be able to take ownership and responsibility for testing in their area
- Not be afraid to take the initiative to improve test processes
- Be proficient in or willing to learn Java, Selenium and Cucumber technologies
- Knowledge of BDD or willing to learn
- Be able to handle multiple threads of work
- Understanding of modern software development processes and software management/deployment tools such as maven, git, docker, AWS, Jenkins etc.
- A 'can-do' attitude working across flexible and cross-functional teams in software and data science

Additionally, any experience in the following would be advantageous:

- Background in Java development, particularly around building REST APIs
- Elasticsearch technology

What We Offer

A career at SciBite comes with the chance to help tackle real-world challenges of some of the biggest companies in biomedicine and beyond. Coupled with that comes competitive salary, a fantastic benefits package, share options and the chance to work in an environment that encourages innovation and personal development. Perhaps most importantly, working at SciBite offers a chance to enjoy working in a small, friendly team where what you contribute really makes a difference. If you're excited by innovation and want to join a company that's breaking new ground and growing quickly, please apply at careers@scibite.com quoting the position reference above.
