

## Software Engineer – Full Time, Permanent

Job Reference	SCISEUK21
Job Title	Software Engineer
Location	Cambridge, UK
Salary	£ Competitive dependent on experience
Benefits	Healthcare, Pension, 25 days annual leave
Hours	Hours: 35 hours per week (Monday – Friday)

### **The Company**

SciBite Limited is a multi-award-winning life-sciences technology company based in Cambridge UK which is transforming the way life science organisations handle text and documents. Our semantic deep-learning solutions understand the complexity and variability of content within Life Sciences yet are still simple to use. We can quickly identify and extract scientific terminology from unstructured text and transform it into valuable machine-readable data. Our tools are flexible and versatile, facilitating use by both end-user scientists and integration into 3rd party applications. Our team of expert software engineers and data scientists are at the forefront of the latest developments in AI, such as ontologies, knowledge graphs and machine learning. Through our parent company, Elsevier, our team has access to an incredible range of resources, content, and opportunity from a global life-science leader, while retaining that agile small company feel.

### **The Role**

We're known for solving the problems other solutions can't and we're looking for developers and engineers who thrive when faced with new challenges and opportunities. You'll be joining at an exciting time as we begin to design and develop our new semantic platform and you will play an important role in making this vision a reality. We're not a software shop, but a team that engages in collaborative R&D with our customers to devise new solutions to problems they're facing. The main duties of this role include:

### **Duties**

- Interface with other technical personnel or team members to finalize requirements
  - Write and review portions of detailed specifications for the development of system components of moderate complexity
  - Work closely with other development team members to understand moderately complex product requirements and translate them into software designs
  - Successfully implement development processes, coding best practices, and code reviews
  - Operate in various development environments (Agile, Waterfall, etc.) while collaborating with key stakeholders
-

- Resolve technical issues as necessary
- Keep abreast of new technology developments.

### Technical Skills

- Understanding of data modelling principles
- Ability to work with complex data models
- Proficiency in development languages including but not limited to: Java/J2EE, JavaScript, JSP, C/C++, HTML, XML, SQL, Windows, UNIX, and .Net.
- Ability to work well with internal and external technology resources
- Ability to write and review portions of detailed specifications for the development of system components of moderate complexity
- Knowledge of software development methodologies (e.g., Agile, Waterfall)
- Knowledge of data manipulation languages
- Knowledge of test-driven development
- Ability to complete moderately complex bug fixes
- Good oral and written communications skills

### Qualifications/Skills/Experience

The ideal candidate for this role will have:

- 3+ years of Software Engineering experience
- BS Engineering/Computer Science or equivalent experience required
- Understanding of modern software development processes and software management/deployment tools such as maven, git, docker, AWS, Jenkins etc
- A 'can-do' attitude working across flexible and cross-functional teams in software and data science

### What We Offer

A career at SciBite comes with the chance to help tackle real-world challenges of some of the biggest companies in biomedicine and beyond. Coupled with that comes competitive salary, a fantastic benefits package, share options and the chance to work in an environment that encourages innovation and personal development. Perhaps most importantly, working at SciBite offers a chance to enjoy working in a small, friendly team where what you contribute really makes a difference. If you're excited by innovation and want to join a company that's breaking new ground and growing quickly, please apply at [careers@scibite.com](mailto:careers@scibite.com) quoting the position reference above.
